Glass Shades for Lawn Lights and Landscape Fixtures

01

Garden Lawn Lights

Glass shades for decorative garden lamps and lawn fixtures. Suitable for soft illumination and outdoor accents.

02

Pathway Lights

Compact glass covers for low-level pathway lighting, garden walkways and landscape routes.

03

Bollard Lights

Durable glass components for bollard fixtures in gardens, courtyards and commercial outdoor projects.

04

Post-Top Garden Lights

Globe, lantern and cylinder glass shades for post-top fixtures and decorative garden lighting.

05

Courtyard Lawn Fixtures

Custom glass shades for patios, villa gardens, courtyard lighting and outdoor hospitality spaces.

06

Landscape Lighting

Glass shade options for repeated landscape fixtures where stable dimensions and protective packing matter.

PROJECT FOCUS

Fixture photos, dimensions, opening size, installation environment and quantity help us recommend suitable glass shade options for lawn lighting projects.

Recommended Glass Options for Lawn Lights

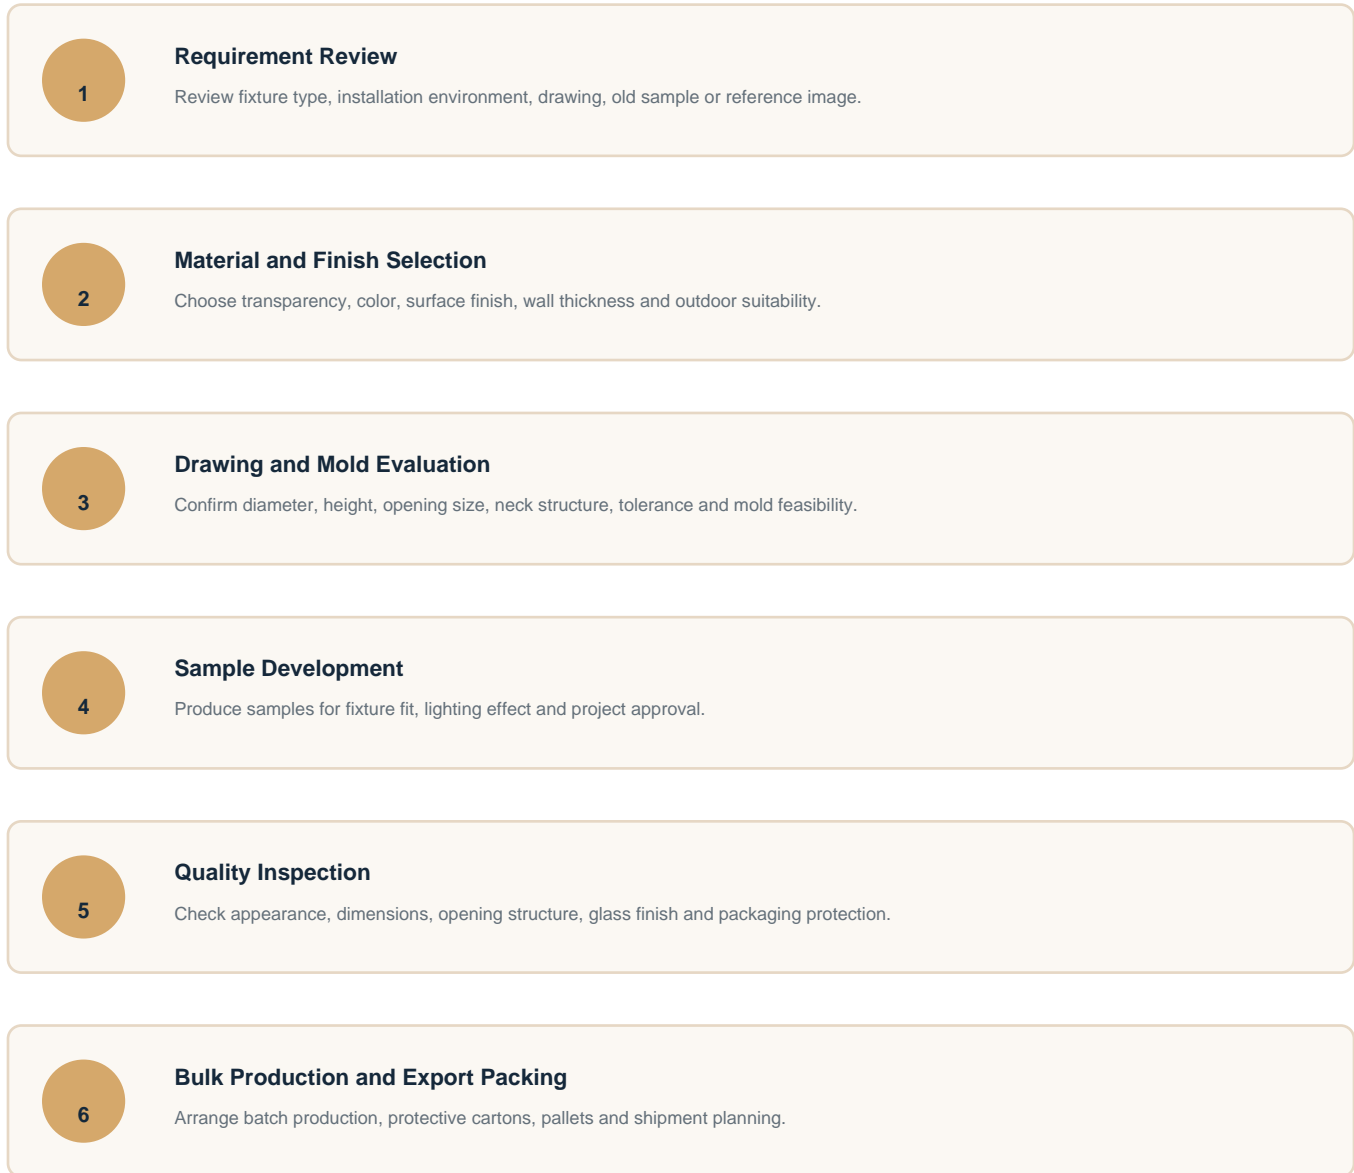

<p>Clear Glass</p> <p>High transparency for lanterns, post lamps and decorative lawn fixtures with visible bulb glow.</p>	<p>Frosted Glass</p> <p>Uniform diffusion and reduced glare for pathway lights and softer landscape lighting.</p>
<p>Opal / Milk Glass</p> <p>Gentle diffusion for garden globes, decorative lawn lamps and comfortable ambient light.</p>	<p>Ribbed / Fluted Glass</p> <p>Decorative texture for vintage-style garden lamps, courtyard fixtures and feature lighting.</p>
<p>Thick Glass</p> <p>A more robust glass option for exposed installations and protective outdoor lighting requirements.</p>	<p>Borosilicate Glass</p> <p>Improved thermal shock resistance for more demanding applications with temperature variation.</p>

PRODUCT TYPES

- Glass globes
- Cylinder glass shades
- Cone glass covers
- Lantern glass shades
- Ribbed glass shades
- Custom molded covers

Custom Lawn Light Glass Shade Development Workflow

From fixture review to export packing, each step is designed to support clear communication and repeatable bulk production.
