# Glass Shades for Common Outdoor Lighting Applications

Choose the right glass shade structure for each fixture type and installation environment.

01

## Garden Lights

Glass shades for decorative garden lamps, lawn fixtures and landscape lighting. Suitable for soft illumination and visual accents.

02

## Courtyard Lighting

Custom glass lamp shades for patios, villas and courtyard fixtures that need an elegant outdoor appearance.

03

## Wall Lanterns

Clear, frosted or ribbed glass shades for exterior wall lights, entrance lighting and covered outdoor walls.

04

## Pathway Lights

Compact glass covers for low-level lighting along walkways, gardens and outdoor circulation areas.

05

## Post Lamps

Glass globes, cylinders and custom-shaped shades for post-top fixtures and decorative outdoor lamps.

06

## Bollard Lights

Durable glass components for bollard fixtures, landscape lighting and commercial outdoor projects.

### Project focus

Fixture photos, drawings, opening dimensions and installation environment help us recommend suitable glass materials and finishes.

# Recommended Glass Options for Outdoor Lamp Shades

Select the right appearance, diffusion level and technical performance for your outdoor fixture design.

## Clear Glass

High transparency for wall lanterns, post lamps and exposed-bulb fixture designs.

## Frosted Glass

Uniform light diffusion and glare control for comfortable outdoor ambience.

## Opal / Milk Glass

Soft, elegant illumination for courtyard lamps, pathway lights and decorative globes.

## Ribbed / Fluted Glass

Decorative texture and visual character for vintage-inspired or premium exterior fixtures.

## Thick Glass

A more robust glass option for exposed installations and protective lighting requirements.

## Borosilicate Glass

Improved thermal shock resistance for more demanding outdoor and technical applications.

## PRODUCT TYPES

- Outdoor glass globes
- Garden lamp glass covers
- Wall lantern glass shades
- Pathway light glass shades
- Post light glass shades
- Outdoor pendant glass shades

# Custom Outdoor Glass Shade Development Workflow

From fixture review to export packing, each step is designed to support clear communication and repeatable bulk

1

## Requirement Review

Review fixture type, installation environment, drawing, sample or reference image.

2

## Material and Finish Selection

Choose transparency, color, surface finish, wall thickness and outdoor suitability.

3

## Drawing and Mold Evaluation

Confirm diameter, height, opening, neck structure, tolerance and mold feasibility.

4

## Sample Development

Produce samples for fixture fit, lighting effect and project approval.

5

## Quality Inspection

Check appearance, dimensions, opening structure, glass finish and packaging protection.

6

## Bulk Production and Export Packing

Arrange batch production, protective cartons, pallets and shipment planning.

# Information to Provide for an Outdoor Lamp Shade Quote
