Glass Shades for Every Dining and Cafe Area

Dining Tables

Pendant glass shades can create focused and comfortable illumination above dining tables. Amber, clear and opal glass support different restaurant styles.

Coffee Bars

Decorative pendant shades and glass globes are suitable for coffee bars, service counters and feature lighting. Ribbed and clear glass add visual detail.

Restaurant Entrances

Statement lighting helps create a stronger first impression. Decorative glass pendants and wall sconces work well in reception and waiting areas.

Private Dining Rooms

Opal, amber and frosted glass shades support softer and more refined lighting for private dining environments.

Cafe Seating Areas

Clear glass globes, amber pendants and vintage-inspired shades can create warm and distinctive seating-area lighting.

Wall Sconces and Features

Compact wall lamp glass shades can support corridors, feature walls, seating areas and entrance lighting.

PROJECT FOCUS

For quotation, share the restaurant or cafe area, fixture type, glass shade dimensions, opening size, preferred finish, quantity and reference images.

Recommended Glass Options for Restaurant Lighting

<p>Amber Glass</p> <p>Best for: Warm dining atmosphere, bars and coffee counters</p> <p>Effect: Warm tone and inviting ambience</p>	<p>Clear Glass</p> <p>Best for: Cafe pendants and exposed-bulb fixtures</p> <p>Effect: High transparency and clean look</p>

From Restaurant Concept to Glass Shade Production

A clear workflow helps restaurant buyers, cafe chains, lighting brands and project contractors move from fixture concept to sample approval and bulk delivery.

01

Project Brief

Share restaurant style, fixture type, target area, reference images and expected lighting effect.

02

Glass Selection

Choose opal, amber, smoke, clear, frosted, ribbed or custom colored glass.

03

Drawing Review

Confirm diameter, height, opening size, fitter structure, thickness and tolerance.

04

Sample Making

Develop samples according to confirmed dimensions, finish and visual standard.

05

Quality Check

Inspect appearance, color tone, opening, dimensions and packaging method.

06

Bulk Delivery

Arrange batch production, protective export packaging and project shipment.
